Subject: Microsoft Settlement

I believe the proposed settlement is bad, settles nothing, does not adequately protect citizens and does not protect businesses competing with Microsoft sufficiently. It is my belief that a component of the success of American capitalism is treating businesses more or less like citizens. Treating multi-billion dollar companies with huge lobbying power (Microsoft) "more equally" than other businesses or citizens is the quickest way to ruin this country. Do not let Microsoft's lawyers or public reputation people mislead you.
